STARCROSS BRAND ALFALFA

STARCROSS BRAND ALFALFA

OFFERS THESE IMPORTANT BENEFITS

STARCROSS Brand alfalfa has been developed to provide peak performance in those characteristics so important to high yields of better quality alfalfa—

- **Real Seedling Vigor**
for quick stand establishment
- **Wilt Resistance**
- **Winter Hardiness**
- **Fine Stemmed, Leafy Plants**
that add so much to forage quality.

NOW! Research Brings You a New Dependable High Quality Alfalfa SEXAUER STARCROSS BRAND ALFALFA

STARCROSS Brand is first generation seed as a result of combining basic stocks derived from the best germplasm released by State Agricultural Stations and the United States Department of Agriculture. While all alfalfa has a certain degree of hybrid vigor, STARCROSS Brand has been developed to increased hybrid vigor for better performance. STARCROSS brand alfalfa is a product of plant breeding, not a mechanical blend of available varieties.

STARCROSS Brand is specifically adapted to the Upper Midwest for hay production, plow down or pasture. The seed has been developed and grown in the new West Coast seed production area by the Waterman-Loomis Co., one of the nation's leaders in alfalfa seed production and research. The testing has been done here in the Midwest.

How Does Starcross Brand Compare With Ranger:

STARCROSS brand alfalfa has the ability to deliver greater seedling vigor for quicker stand establishment.

STARCROSS Brand alfalfa will hold its leaves and its leaf color longer periods of time.

STARCROSS Brand will prove more winter-hardy in many areas of the Upper Midwest.

STARCROSS Brand's added vigor and its fine-stemmed leafier plants will make higher quality hay and pasture.

New Moisture-Proof Carton

STARCROSS Brand is packaged in a new corrugated box container that contains 50 pounds of seed and provides greater moisture protection, ease of handling and customer convenience than the traditional cloth sack. One side gives tips on proven practices in soil treatment, seed bed preparation and seeding.

SEXAUER 660 BRAND

Get These 6 Alfalfa Features From 1 Variety Blend

1. INCREASED YIELDS
2. INCREASED WINTER HARDINESS
3. INCREASED DROUGHT AND DISEASE RESISTANCE
4. VIGOROUS GROWTH
5. QUICKER RECOVERY AFTER CUTTING
6. GUARANTEED HIGH PURITY AND GERMINATION

The Sexauer Company takes the guesswork out of choosing which alfalfa variety will do best on your farm with SEXAUER 660 Brand, blend of Northern grown alfalfa varieties proven to do best in this area. You get the best characteristics of each of the currently recommended varieties, to free you from the often inconsistent performances of common and single-variety alfalfas. SEXAUER 660 Brand is formulated from selected strains of hardy Northern-grown alfalfa of verified origin. The bags are sealed for your protection. When the seal is unbroken we guarantee the contents to be genuine SEXAUER 660 Brand alfalfa.

Perfected Through Modern Seed Science

From SEXAUER 660 Brand you can expect consistent performance and higher yields year after year from your winter-hardy alfalfa stands. No single variety of alfalfa has all the features farmers want. Some are more resistant to drought and bacterial wilt, some live longer, some recover faster, some are more winter-hardy.

Experience with Northern seeds dating back to 1891 combined with the latest scientific methods of seed genetics has enabled the Sexauer Company to develop the new "660 Brand" to give you better alfalfa crops year after year. SEXAUER 660 Brand meets our highest standards for purity, germination, and freedom from noxious weeds. It is "Perfection" quality—a trade name we attach only to top quality seed.

Exclusive Process Improves Early Stands

The Sexauer Company is using a special process to give SEXAUER 660 Brand alfalfa quick germination. The process does not injure the seed coat as old scarification methods often did, but enables the seedling to break out of the seed coat easily.

SEXAUER 660 provides excellent stands of hardy Northern Alfalfa with increased drought and disease resistance.
